**EDGE** Certification Checklist

Building Type	Certification Stage	Subproject Name		
Homes	Preliminary	The Viva Residence 1BD Block T3&T4		
Energy Measure	S	Preliminary Audit Requirements		
HME01 Reduced Window to Wall Ratio		<ul> <li>Calculation of "Glazing Area" and "Gross Exterior Wall Area" for each façade of the building and the average building area weighted WWR using the WWR calculator</li> </ul>		
		<ul> <li>All façade elevation drawings showing glazing dimensions and general building dimensions.</li> </ul>		
HME04	External Shading Devices	<ul> <li>All façade elevation drawings highlighting the provision of horizontal and vertical shading devices.</li> </ul>		
		✓ Window details clearly showing the depth of the shading device and the calculation of the proportion.		
		If vertical and horizontal shading are not provided on all windows, the design team will need to provide the output from the solar shading design software.		
HME05	Insulation of Roof	A roof construction detail drawing showing the type and thickness of insulation material. Ideally the roof detail drawing should be annotated with the U Value of the roof.		
		$\checkmark$ Calculations of U value either using the formula or U value calculators.		
		Manufacturer's data sheet of specified insulation material for the roof.		
HME06	Insulation of External Walls	<ul> <li>External walls construction detail drawing showing the type and thickness of the insulation material. Ideally the external walls detail drawing should be annotated with the U Value of the external walls.</li> </ul>		
		$\checkmark$ Calculations of U value either using the formula or U value calculators.		
		$\checkmark$ Manufacturer's data sheet of specified insulation material for the external walls.
